# SPOCK - AI Native Product Discovery

**Objective:** Make product discovery faster, more consistent, and more evidence-based while keeping product teams accountable for decisions.

## 1st Version Release Septermber Bootcamp | Product Discovery

**Scope**
Brief  Opportunity Framing  Competitive Analysis  Solution Ideation  MVP Definition  PRD  Initiative Creation

**Product trios will use the workflow to:**

- **Reduce discovery cycle time from weeks to days**
- **Apply a consistent discovery methodology**, including OST
- **Produce standardized, higher-quality discovery outputs**
- **Get in-workflow support during the active PDE phase**, particularly for discovery

## 2027 | Full Release and Scalling

**Expand from a discovery workflow to a governed product operating model**

- **One governed platform** — shared standards, context and product knowledge across teams
- **Evidence-based decisions** — stronger traceability from initial insight to build-ready solution
- **One product lifecycle** — a consistent 8-stage process from Brief through Delivery & Iteration

## SUCCESS MEASURES

**Speed**
**Time to validated idea**

**Quality & Adoption**
Human approval rate of AI-supported outputs

**Decision Quality**
Less rework, stronger downstream decisions and better traceability
